

Glass Waiver

I _____ release Donny & Rebecca Mishio/ D.B.A. Simply Clean of liability caused to the windows in the cleaning process or of any damages or scratches **already present** to the glass. Tempered glass can possibly produce scratches when you use standard window cleaning techniques to remove debris from the glass surface. This is caused by poor quality tempered glass from the factory or what we call, “fabricating debris” in the glass at the time of manufacturing.

It is accepted and understood by **ALL** parties that properly used specialized window scrapers and non-abrasive cleaning pads are standard tools and techniques for window cleaning and can safely remove limited amounts of debris (plaster, paint, texture, tape, stickers, mortar, caulk, etc.) from **quality** glass without scratching or damaging the glass surface.

Furthermore, it is accepted, that the use of specialized window scrapers and non-abrasive cleaning pads will be employed on the windows for the cleaning, if needed and requested by the customer. No other form of cleaning method will be offered at this time to remove debris from any glass surface.

Glass Manufactures, Contractors and Sub-Contractors should be held responsible for the debris in or on the glass and the risk of its removal.

***Simply Clean is not responsible for any damages to the window in this cleaning process or damages already present.**
